Exhibit sponsored by

FRIENDS of the ALASKA STATE LIBRARY, ARCHIVES & MUSEUM

As We See It brings together the work of eight contemporary Native American photographers and filmmakers to develop a dialogue around representation, portraiture and landscape. By its nature, photography does not just capture images of the world, it also recreates the world by presenting a coercive vision. This exhibition offers personal perspectives on Indigenous cultures, on the history of photography, and on the importance of a Native view to the world at large.
