

Cut out corners
Accordian fold on dotted lines

fold
back

Fold this top flap to inside of frame.

Book Frame Template

Print 3 on heavy white or light gray cardstock.

Basic instructions:

1. Cut out this center rectangle on the solid lines of all three frames with X-acto knife.
2. Cut out the 4 corners of each frame on the solid lines.
3. Using "bone folder" and straight edge, score a fold line into the paper along all the dotted lines.
4. Choose images from the image sheet you wish to use in your composition and cut out.
5. Attach the images to the individual frames so that they adhere to one inside edge of the frame but some portion of the image projects into the window opening of the frame.
5. Attach images to the back panel as well.
6. Place the frames in an order so that the images are arranged in four different planes and viewed in an order you like.
7. Use double stick tape to adhere the outer fold of the hinge to the frame behind it.

See images of completed projects as a guide.
