

Insect Identification

Common Heritage Eaters

1. Cigarette beetle
2. Drugstore beetle
3. Confused flour beetle
4. Saw-toothed grain beetle
5. Carpet beetle
6. Common carpet beetle larvae
7. Varied carpet beetle
8. Common dermestid beetle
9. Larder beetle
10. Webbing clothes moth
11. American spider beetle
12. Hide beetle

Common "Harmless" Bugs

- 1-2. Spiders eat other insects, not collections. Spiders can be reduced by sticky traps.
3. Minute scavenger beetles eat mostly molds and fungi.
4. Common weevil, a grain eater.
5. Carpenter ants don't eat artifacts but indicate building problems.
6. Common housefly, mostly a nuisance for leaving droppings called "flyspecks."
7. Picnic ants look for sugar.
- 8-9. Sowbugs come in many shapes and live in damp areas.
- 10-12. Carabids, click beetles and other large beetles are generally harmless.

Insect Debris

1. Frass
2. Larva and casings
3. Cocoons
